## Learning Management System (LMS)

The Central Library has automated by using world's first free open source library automation software "KOHA" and all the library books are uploaded as per KOHA formats. Koha is an Integrated Library Management System (ILMS) that has most of the features that would be expected in an ILMS. It was designed to automate all housekeeping operations in a library. The KOHA consists of five modules for acquisition, cataloguing, circulation & patron management, serial management, OPAC (Online Public Access Catalogue), reporting and administration. Through these modules, various activities of the library such as data entry, billing, circulation, cataloguing etc. are done. All the books are barcoded using software.
